

# Does your cat have chronic constipation ?

- Infrequent emission of feces
- Dry and/or firm stool consistency
  - Straining while defecating
- Frequent attempts to evacuate bowels

Is your cat at least 1 year of age?

Has your cat previously and/or currently been constipated for at least 14 days? Within those 14 days, has your cat had at least 2 episodes of not passing stool for 24 hours?

Would you be interested in enrolling your cat in a clinical *food trial*?

*If qualified, your cat will receive examinations, blood testing, stool analysis, and a therapeutic diet at no cost. Owners will also receive compensation for participation.*

**If you answered 'yes' to the above questions, please contact Seguin Animal Hospital at (830-379-3821) for more information.**
