

Does your dog have a history of chronic diarrhea, including any of the following symptoms?

- Straining to defecate
- Frequent bowel movements
- Mucous or blood in stool
- Loose stool

Has your dog experienced frequent loose or slimy stools for the past few weeks?

If you've answered yes to the above questions, your dog may qualify for a free clinical trial to evaluate the use of a dog food to help control chronic colitis. The trial is approximately 8 weeks long, and further inclusion/exclusion criteria apply. All study related food and exams are at no cost to you.
